

BEACHSIDE LEIGHTON

PROJECT DETAILS

Client: Mirvac

Architect: Mirvac Design

Electrical: BEST Consultants

Lift Services: BEST Consultants

Construction: 2006 – 2010

Value: \$500 Million

PROJECT FEATURES

Sustainable Features such as:

Solar Water Heating

Energy Efficient Fittings

Rainwater Harvesting

Beachside Leighton is a world-class development in Western Australia.

Beachside Leighton is located between Cottesloe and Fremantle, creating a unique beach front village.

This new development combines 390 apartments, beach houses, penthouses, a boutique hotel, restaurants, cafes, shops and extensive landscaped gardens and public parks.

All the apartments have been designed to be water and energy efficient and include intelligent lighting controls and smart communications networks. The development is to the highest building quality and includes quality fittings and finishes.

The central landscaped plaza includes more than 105,000 native plant species and 250 trees. High quality paving, street furniture and indigenous, contemporary and graffiti artwork also highlight this development.

Beachside Leighton has also been developed to maximise the use of the nearby North Fremantle railway line.

Works commenced on Beachside Leighton in May 2006. The central plaza was opened in November 2007. Construction is expected to be complete by 2010.

The design for this modern development has created a new high standard in ocean front living.
